

# PUBLIC NOTICE

## Transmission Planning Meeting for Northeast Zone

**PLEASE TAKE NOTICE** that on September 15, 2009, Minnesota utilities will conduct a public meeting via online webcast (<http://Minnelectrans.Webex.com>) to present information about possible future transmission line projects in the Northeast Minnesota planning zone. The webcast will be an opportunity for local government officials and the general public to provide input about local transmission needs and inadequacies and possible solutions. The meeting will be held:

**Date: September 15, 2009**

**Time: 10:00 am-12:00 pm**

**Location: <http://Minnelectrans.Webex.com>**

*Pre-registration is not required*

*To register/view the web cast, visit <http://Minnelectrans.Webex.com> and click on the meeting you'd like to attend, enter your name and email address to continue.*

Email addresses will not be shared with anyone

If you do not have Internet access you may attend the webcast in person at

Minnesota Power  
30 W. Superior St.  
Duluth MN  
Room 140

**Transmission Planning Report.** Minnesota electric utilities with transmission lines in the state are required by law to conduct transmission planning and identify reasonably foreseeable inadequacies in the transmission system. The utilities must file a Biennial Transmission Projects Report with the Public Utilities Commission by November 1 in each odd numbered year.

**Northeast Zone.** The utilities have identified areas in the Northeast Zone where inadequacies exist. Additional information, including a map of the Northeast Zone and a list of the inadequacies reported in 2007 is available in the 2007 Report, which can be found at [www.Minnelectrans.com](http://www.Minnelectrans.com). Utility representatives will be available online during the webcast to provide an update of the various inadequacies.

**Regional Projects and Renewable Energy.** Several projects are either involved in regulatory proceedings, are being studied or have been proposed in various parts of the state. These projects include the CapX2020 projects, the Green Power Express and other transmission lines designed to help Minnesota utilities meet the Minnesota Renewable Energy Standard, enacted into law in 2007.

Information on the CapX2020 projects can be found at [www.CapX2020.com](http://www.CapX2020.com). Information on the Minnesota Renewable Energy Standard studies can be found at [www.Minnelectrans.com](http://www.Minnelectrans.com). Information on the Green Power Express can be found at [www.ITCMidwest.com](http://www.ITCMidwest.com).

**Public Input.** The public is invited to attend this webcast and learn more about the inadequacies in the area. Utility representatives will explain the transmission planning process, describe the inadequacies that have been identified, describe alternative solutions under consideration, and discuss state energy goals and objectives. The public is encouraged to raise concerns and bring information on local transmission needs to the attention of the utilities. Input from the public and local government officials on possible other inadequacies in the area and alternative ideas for address any of these is particularly encouraged.
